Dear customer,

Trajan Scientific and Medical, advise that our part number 0932922, UTX-IWG Insulation Wedges Pk10, is no longer available.

Our supply review was prompted by our supplier's unexpected decision to discontinue importation of the raw material into Australia. As a result, Trajan will be unable to supply against any current order or any future order for this part.

The Unitrex instrument (that uses this part) was made obsolete in December 2011. It was expected that replacement parts would continue to be available through to December 2018. Unfortunately circumstance has driven the immediate discontinuation of this product.

Trajan Scientific and Medical apologises for any inconvenience caused.

Yours Sincerely

Trajan Scientific and Medical

March 2016
